

DISPOSABLE ARTICLE PROVIDING
IMPROVED MANAGEMENT OF BODILY EXUDATES

5

ABSTRACT

A disposable article adapted to receive bodily exudates which provides improved management of such bodily exudates by including an effective amount of one or more agents which act to modify the physical properties of feces or other bodily wastes which may be deposited in the article, or by including one or more compositions such as the aforesaid one or more agents which enhance the removability of bodily waste, such as feces, from the skin of the article's wearer.
